## --ATTACHMENT TO ADVISORY—

The amendment and remarks filed in Paper No. 8, dated Feb. 23, 2004 have been considered carefully but are deemed to be not persuasive and will not be entered for the following reason:

- 1. Because many arguments resulted from which set of specification was correct and applicants did not follow MPEP in filing a substituted specification such arguments at this late stage of prosecution raised new issues. Therefore, the amendments based on such arguments will not be entered for reconsideration.
- 2. The amendments did not correct all the 112 issues as well as obviate the art rejection. See for example, in proposed new claim 39, it reads R4 is an "aryl *including one or more heteroatoms selected from O,S, and N...*" Not only it is unclear as to what this including mean, substituted? Ring heteroatom? Etc. It was given the broadest interpretation thus will read on compounds of RN 562082-85-3 since both heteroinclusion in the ring and as substituents exist. Arguments presented by applicants are based upon "what" applicants are considered as inclusive or exclusive of the newly substituted specification. Because the specification was not even verified at the time the second office action was issued, such arguments must be considered as new issues. Therefore, the amendments based on such arguments will not be entered for reconsideration.
